Queens, NY | (929) - 371 - 0148 | [LinkedIn](#) | [Github](#)

EDUCATION

Pursuit Fellowship Bootcamp
Certification in Full Stack Development

- Most excelled student of 9.6 Cohort

Long Island City, Ny
Cumulative GPA 3.7

WORK EXPERIENCE

Extra Space Storage
Junior Software Engineer

Hicksville, NY(Remote)
Apr 2020 - Present

- Responsible for developing and maintaining the frontend codebase, emphasizing efficiency, readability, and maintainability using JavaScript.
- Collaborate closely with cross-functional teams to gather requirements, design user interfaces, and craft high-quality web applications employing JavaScript and ReactJs.
- Execute responsive software development and integration within an agile development framework.
- Proficiently work with REST services/APIs to seamlessly integrate backend functionality into frontend applications.

PROJECTS

- YouTube Clone - As a personal project, I designed and developed a YouTube clone that includes key features such as video uploading, commenting, and user subscriptions. TO ensure smooth playback on various network conditions, I integrated a video player with support for adaptive bitrate streaming. I also implemented a real time search functionality with Elasticsearch for instantaneous suggestions. My work involved implementing caching techniques and optimizing database queries. I specialize in JavaScript, TypeScript, and React, with focus on robust UI development. I possess exceptional problem solving skills and take proactive ownership of challenges. I'm inherently curious and motivated to merge technology and product experiences to create user centric solutions. I'm equally comfortable working independently and proactively engaging in collaborative efforts. I also utilized the YouTube API to facilitate searches.

SKILLS & INTEREST

- Proactive in Java, Spring Boot, HTML, and CSS.
- Highly skilled in cross functional collaboration and effective communication with team members.
- Thrive in fast paced agile environments, underpinned by strong analytical and communication skills.
- Passionate about continuously learning new concepts and frameworks for the betterment of the company.
